Summary

Backend Developer focused on Python, FastAPI, Django REST Framework (DRF), and PostgreSQL, specializing in API development and system integrations. Experienced in both modern applications and legacy systems in Delphi and Firebird, consistently striving to build robust, testable, and maintainable solutions. Passionate about learning new technologies and improving software development processes, particularly through DevOps practices.

Experience

Soluverti

Erechim, RS, Brazil

Software Developer

Jan 2025 – Present

- Led end-to-end development of WhatsApp integration using Python, FastAPI, and PostgreSQL to build REST APIs and Webhooks; developed integration classes connecting a legacy ERP with the Gupshup platform to automate appointment confirmation workflows.
- Built and maintained Python APIs using FastAPI to integrate a legacy ERP with a modern web application, ensuring reliable cross-platform communication and facilitating the continuous feature development of both systems.
- Served as the lead developer for a Python and Django REST Framework (DRF) project, quickly adapting to the framework and delivering core features for the application.
- Implemented automated testing with Pytest integrated into a CI pipeline, driving DevOps adoption and Docker containerization to simplify environment setup, increase stability, and reduce deployment times by up to 80%.
- Contributed to backend architecture standardization by introducing a layered architecture model, reducing component coupling and improving the maintainability and scalability of Python services.
- Structured the containerization of Python services using Docker, standardizing development and deployment environments while eliminating manual dependency management during releases.
- Collaborated with cross-functional development and product teams to evolve system modules, enhancing overall system architecture, security, usability, and user experience.

Skills

- **Technical:** Python, FastAPI, Docker, Django REST Framework, Pytest, Linux, SQL, PostgreSQL, Firebird, JavaScript, React
- **Languages:** Portuguese (Native), English (Intermediate)

Education

Universidade Regional Integrada do Alto Uruguai e das Missões

Erechim, Brazil

B.Sc. in Computer Science

Feb 2023 – Dec 2026

- Program focused on core computer science fundamentals, covering algorithms, computer architecture, operating systems, networking, and software engineering.
